BACKGROUND

- ✓ **For just about twenty years, Thunder Bay Ventures (TBV) administered a small business survey in order to examine the attitude of the business community towards specific issues and developments in the local community.**
 - ✓ The small business surveys provided policymakers, business leaders, and other stakeholders with various insights from local businesses regarding operational challenges and future opportunities.
 - ✓ However, various stakeholders agreed that it was time to revise and reboot the survey in order to reflect recent changes in the business environment.

- ✓ **After years of deliberation, Thunder Bay Ventures and its advisors decided to revise the small business survey into a Business Confidence Index (BCI).**
 - ✓ The purpose of the BCI is to gauge the overall business confidence level in the Thunder Bay and Area, and also explore the impact of individual elements of overall confidence levels.
 - ✓ The current plan is for the BCI to be administered biennially in order to allow for a time-series (changes in Thunder Bay and Area's BCI over time) and cross-section analysis (comparison of Thunder Bay and Area with other regions).

RESEARCH DESIGN & SAMPLE ASSESSMENT

RESEARCH OBJECTIVES

- ✓ **The purpose of the BCI is to obtain insights from local business owners and executives into current and anticipated economic business conditions, capital purchase and hiring intentions, and other top of mind business issues.**

- ✓ **Aside from overall economic conditions, this research also explores local business's opinions regarding:**
 - Actions taken by local businesses to respond to current economic conditions in the Thunder Bay Area;
 - Amount of goods and services that businesses purchase locally;
 - Strategies employed by local businesses to grow organically;
 - The impact of key Federal and Provincial government policies on business activities; and
 - The top issues facing local business.

- ✓ **The results of this study are intended to provide local businesses and policy makers with insights into the various opportunities and challenges confronting local business owners in Thunder Bay and the surrounding area. Ideally, these findings will help to inform future policies and business opportunities.**

SURVEY DESIGN

- ✓ **Data for the construction of the BCI was obtained by surveying local businesses.**
- ✓ **The survey was designed in conjunction with Corporate Research Associates (“CRA”).**
 - Our survey was based on a similar BCI survey that was administered in Atlantic Canada.
- ✓ **A draft survey was presented by CRA and reviewed by the research team and TBV representatives.**
 - The research team made appropriate adjustments in order to reflect the unique characteristics of the Thunder Bay and Area economy.
- ✓ **The draft survey questions and online programming was extensively reviewed by the research team in conjunction with CRA.**
- ✓ **Prior to finalizing, the draft survey was pre-tested and feedback was obtained.**

SURVEY ADMINISTRATION

- ✓ **An online survey was administered to local businesses.**
 - Local business owners were asked to voluntarily participate by completing the survey.
 - Participants included a number of business executives who were recruited by personal invitation, as well as a large number of businesses who were invited to participate by various community associations.
- ✓ **Only individuals that hold a title such as CEO, COO, President, Owner or Managing Director were asked to respond.**
- ✓ **Participants were offered to complete a ballot to win a free Canada Goose Jacket, valued at \$1,000, from Gear Up For Outdoors.**
- ✓ **The survey was administered from August 17, 2017 to September 13, 2017.**

SAMPLE SIZE, CONFIDENCE LEVEL AND MARGIN OF ERROR

- ✓ **Acceptable sample size parameters were established prior to the survey being administered in order to provide acceptable confidence interval and level ranges.**
- ✓ **The final sample size of 185 results in an confidence level of 95% and a maximum margin of error of 7%.**
- ✓ **Note that the sampling risk and margin of error are greater for any between-group / subgroup analyses.**

BUSINESS CONFIDENCE INDEX CONSTRUCTION

- ✓ This inaugural BCI is derived from a series of nine questions which were included in the survey.
- ✓ The BCI was set at a benchmark of 100 for this inaugural computation, and all BCI calculations going forward will be measured relative to this benchmark.
- ✓ The BCI is based on positive or neutral responses (i.e., better or about the same; increase or stay the same; and scores of 6 or higher on the 10-point Likert-scales), excluding negative responses (i.e., worse; decrease; or scores of 5 or lower on the 10-point Likert scales) for each evaluation.
- ✓ The nine questions that underlie the BCI are:
 1. Thunder Bay and Area's economy is stable / moving in a positive direction;
 2. In the next 12 months, my company's revenue will be stable or increase;
 3. In the past year, my company's revenue will be stable or increase;
 4. In the next 12 months, my company's capital expenditures will remain unchanged or increase;
 5. The economic well-being of my company will be stable/better in the next 12 months;
 6. My company's economic well-being is stable / better than it was 12 months ago;
 7. Over the next 12 months, the Thunder Bay and Area economy will be stable / better;
 8. Compared with 12 months ago, the overall state of the Thunder Bay and Area economy is stable or better; and
 9. I am confident in the Thunder Bay and Area's economic future.

RESPONDENTS' DEMOGRAPHIC PROFILE

SAMPLE RESPONDENT PROFILE CONSISTENT WITH EXPECTATIONS & POPULATION

- ✓ **98% of the respondents had some operating activities in Thunder Bay, followed by Other Northern Ontario location (18%).**
- ✓ **The vast majority, 86.5%, of respondents are headquartered in Thunder Bay.**
 - ✓ Other Canadian cities includes Saint John, Edmonton, Kitchener, and Oakville.
- ✓ **Retail trade and repair was the most common industry classification (28.6%), followed by restaurants, cafes and bars (10.3%).**
- ✓ **The vast majority of respondents, 90.8%, have between 1 and 49 employees, with 5.9% having 50+ employees.**
 - ✓ These groupings are consistent with the overall averages for employers in the Thunder Bay area, which further supports the generalizability of the survey results.
- ✓ **The majority of the respondents were business owners, or held the title of President / Managing Director.**
- ✓ **See Appendix 1 for further details.**

BUSINESS CONFIDENCE INDEX (BCI)

INAUGURAL BUSINESS CONFIDENCE INDEX MEASUREMENT

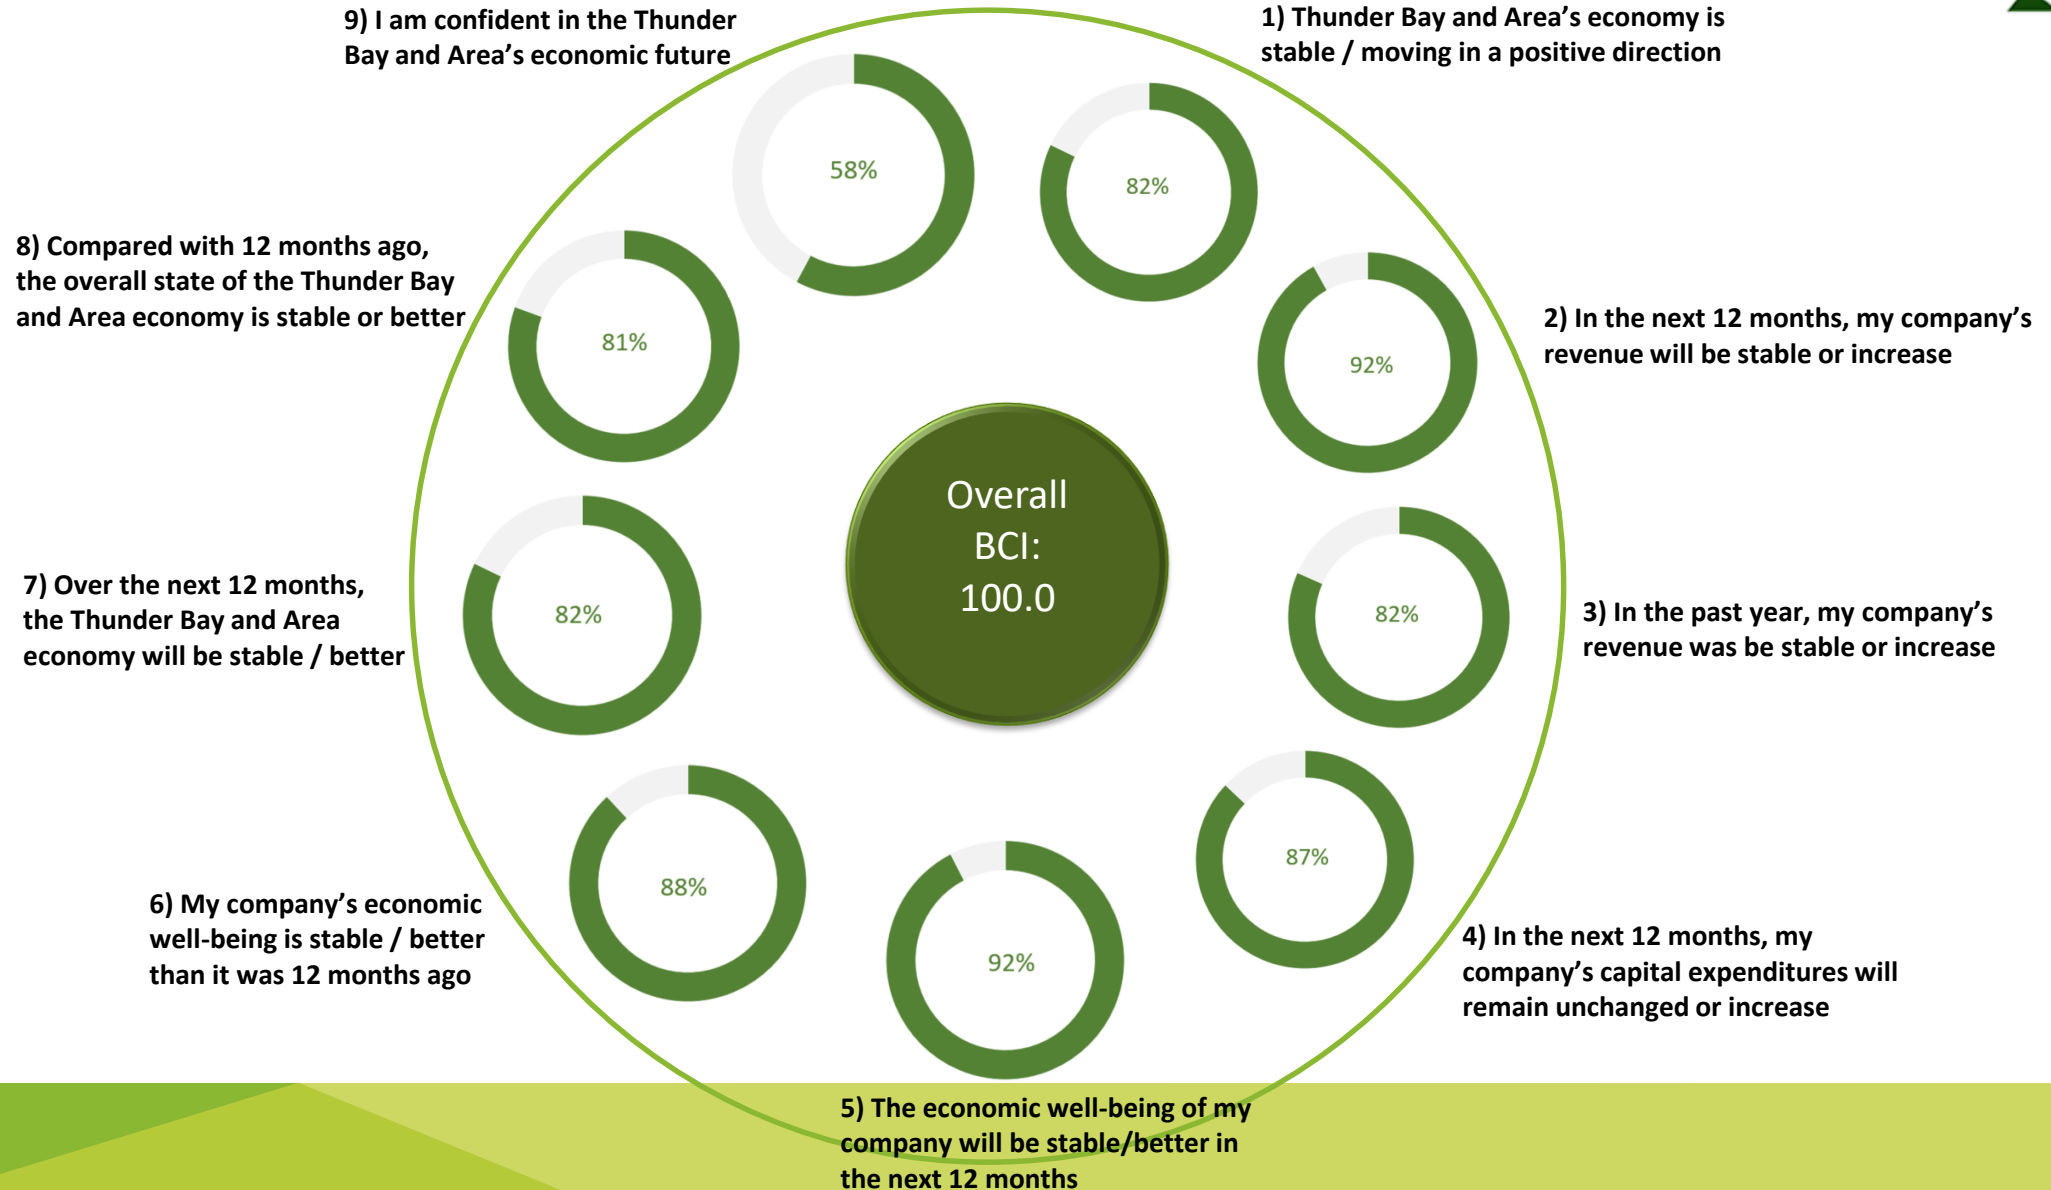

2017 MEASUREMENT IS BASE CASE

- ✓ **The BCI is set to 100.0 for 2017 measurement as this is the first time we are measuring the BCI in the Thunder Bay Area.**
 - ✓ As a result, this inaugural measure establishes the “base-case” by which all future surveys will be measured against.
- ✓ **BCI measures “confidence” based on positive (e.g., “increases”) or neutral (e.g., “no change”) responses to the nine questions.**
 - ✓ This is consistent with measures of business confidence in other Canadian jurisdictions (e.g., Atlantic Canada).
 - ✓ The percentages reported for each of the nine BCI questions therefore represent the percentage of businesses that expect increases or no changes.

BUSINESS CONFIDENCE INDEX
